**Product Description**

Magnetic clamps route bundles by securing to steel surfaces without the need for a mounting hole. Simply enclose the wire bundle in the clamp, close the locking clip, and position it onto the beam, metal joist, ceiling channel, conveyor frame, or other steel surface. Magnetic clamps are simple to secure and can attach to surfaces contaminated with oil or debris. Ultra-strong neodymium magnets are ideal as a permanent mount or for temporary applications. Reuse and reposition them for ultimate flexibility without needing to replace or repurchase parts.
